UNDER THE FINGER TIPS OF ONE HAND

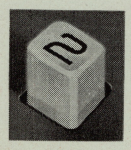
Only 10 NUMERAL *Keys*

YOUR FIGURING CAN BE DONE *FASTER*

10 NUMERAL KEYS MAKE FIGURING FAR SIMPLER

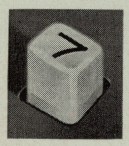
FOR INSTANCE, TO WRITE $2.79

SIMPLY DEPRESS THE 2 KEY, THE 7 KEY AND THE 9 KEY.



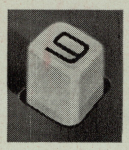
THERE IS ONLY ONE 2 KEY

INSTEAD OF SELECTING THE CORRECT ONE FROM 10 ② ② ② ② ② ② ② ② ② ②



THERE IS ONLY ONE 7 KEY

INSTEAD OF SELECTING THE CORRECT ONE FROM 10 ⑦ ⑦ ⑦ ⑦ ⑦ ⑦ ⑦ ⑦ ⑦ ⑦



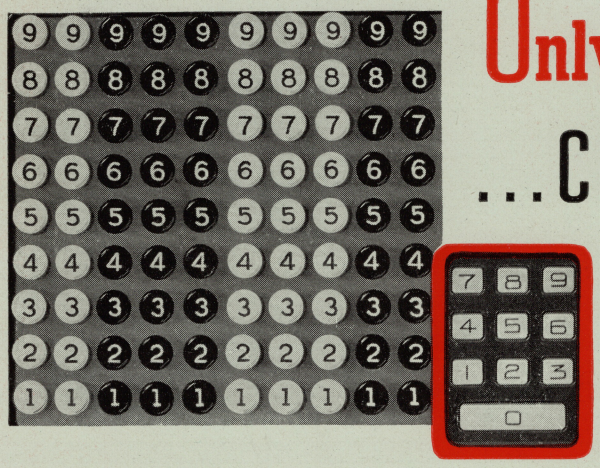
THERE IS ONLY ONE 9 KEY

INSTEAD OF SELECTING THE CORRECT ONE FROM 10 ⑨ ⑨ ⑨ ⑨ ⑨ ⑨ ⑨ ⑨ ⑨ ⑨

● Look at the Underwood Sundstrand Keyboard illustrated at the right. The keys are arranged in natural 1-2-3 sequence. Could anything be simpler? Figures are entered on the keyboard as easily as you would write them with a pencil on paper.

Here is no multiplicity of keys to make busy fingers grope . . . no complicated arrangement to slow down figuring or induce error. There are *Only 10* Numeral Keys. They do the figuring and are *all* compactly grouped under the fingertips of *one* hand.

Watch the operator tap out figures faster on the Underwood Sundstrand. See how the fingers of her right hand flash over the condensed keyboard. Notice that her eyes follow the work. She doesn't have to look at the keyboard. There is no headswing . . . and that means faster, more accurate work. Try it yourself and you will understand how anyone can acquire new speed and efficiency with only the briefest instruction.



Only 1/9 *THE AREA FOR HAND TRAVEL*

...COMPARE

these two keyboards . . . the old-fashioned one with its banks of keys and the simplified Underwood Sundstrand 10-Key Keyboard. Isn't it logical that more work can be produced in less time when hand travel and head swinging are eliminated? Wouldn't a modern 10-Key Keyboard save time and money in *your* business figuring?
